Professional Summary

Results-driven **Senior QA & Automation Engineer** with 4+ years of experience architecting scalable automation frameworks and leading quality initiatives across web, mobile, and API platforms. Proven expertise in **Selenium, Appium, REST Assured, and CI/CD pipelines** with a strong focus on **performance, reliability, and scalability testing**. Adept at collaborating with cross-functional teams to deliver defect-free releases, reduce cycle times, and enhance customer experience. Recognized for **mentoring teams, optimizing processes, and driving measurable improvements in product quality**.

Core Skills

- Automation & QA: **Selenium WebDriver, Appium, TestNG, JUnit, REST Assured, Postman**
- Programming: **Java, Python, SQL**
- DevOps & CI/CD: **Jenkins, Git, Azure DevOps, AWS Cloud**
- Test Management: **Jira, TestRail, ALM**
- Performance & Scalability: **JMeter, BrowserStack, Charles Proxy**
- Methodologies: **Agile/Scrum, SDLC, API Testing, Mobile Automation, Cross-Browser Testing**

Professional Experience

Senior Software Engineer
BrokerApp— [Delhi, Delhi]

Nov 2024 – Present

- Led end-to-end testing efforts for mobile applications, including regression, smoke, and release validation.
- Designed and developed API automation frameworks from scratch using RestAssured & Postman, reducing manual effort by 60%.
- Automated mobile application testing with Appium for Android and iOS, ensuring cross-device stability.
- Performed payment gateway testing, validating transaction flows, third-party integrations, and security compliance.
- Executed cross-device and cross-platform testing using BrowserStack, ensuring consistent UX.
- Used Charles Proxy to debug API and network traffic during mobile testing.
- Collaborated with product and marketing teams to translate business requirements into test strategies.
- Integrated automated suites into CI/CD pipelines, enabling continuous testing and faster releases.
- Identified and resolved critical defects early, reducing production issues by 35%.
- Mentored junior QA engineers, improving team efficiency and automation adoption.

Software Engineer
Netprophets Cyber Private Limited — [Noida, Uttar Pradesh]

June 2022 – Nov 2024

- Automated regression & smoke suites with Selenium & TestNG, reducing manual testing effort by 50%.
- Built cross-browser/device testing frameworks, ensuring consistent UX across environments.
- Executed manual functional, regression, and exploratory testing to validate business workflows and edge cases.
- Designed and maintained manual test cases and checklists for new feature releases.
- Wrote SQL queries for backend validation and data integrity checks.
- Maintained Jenkins CI/CD pipelines for seamless deployments.
- Participated in Agile ceremonies (sprint planning, stand-ups, retrospectives).
- Conducted UAT (User Acceptance Testing) with stakeholders, ensuring product readiness before rollout.
- Collaborated with developers and product owners to perform requirement analysis, defect triage, and risk assessment.
- Logged and tracked defects in Jira, ensuring timely resolution and improved release quality.

Education

- Bachelor of Technology (B.Tech) in Computer Science
Abdul Kalam Technical University — [Lucknow, Uttar Pradesh]
Graduated: June 2022
